SHADOW  
STORM**base function**

## TRAVEL LAPTOP

Shadow Storm is a low-visibility RF-shielded laptop, built on the Framework modular laptop platform, designed for security-conscious field operations. It provides advanced shielding and powerful computing for secure mission environments. Its modularity allows for seamless upgrades with highly specialized accessories.

## FEATURES

**RF Shielding:** Full electromagnetic interference protection, ensuring secure operation.

**Shielded USB Charging:** Allows safe and interference-free charging, even in sensitive environments.

**Modular Design:** Built on the Framework platform, customizable for various mission requirements.

**1Gb Fiber to Thunderbolt Networking Adapter:** For high-speed, secure data transmission.

**Lightweight & Portable:** Rugged design with a low-visibility profile.
